## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species of opening preventing portion are as follows:

Species I : a seal to peel off the communication portion by the expanding.

Species II : a folded tube having elasticity to recover by the expanding.

Species III : a clip to drop by the expanding

Species IV : a seal to peel off the communication portion by the hanging.

Species V : a clip to drop by the hanging.

Species VI : a clogging member to be detached by the hanging.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The following claim(s) are generic: no claims appear to be generic.
3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common technical feature in all the groups is a multi-chamber. This element cannot be a special technical feature under PCT Rule 13.2 because the element is known in the prior art. JP2002-053140 teaches a multi-chamber. Therefore, because the feature does not define a contribution over the prior art, it can not be a special technical feature under PCT Rule 13.2, therefore unity is lacking.
4. A telephone call was made to Richard Michaud on 07/17/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAUSHIKKUMAR DESAI whose telephone number is (571)270-7290. The examiner can normally be reached on Monday- Friday 7:00 AM - 4:30 PM EST.
